EDUCATION AND TRAINING:

Bachelor of Engineering- Software Engineering

Graduating April 2025

Ontario Tech University – Oshawa, ON.

Courses: Web Programming, Artificial Intelligence, Software Design, Data Structure & Algorithms, Data Management

SKILLS:

Languages: Java, JavaScript, Typescript, Python, C#, C, C++, PHP, SQL, HTML, CSS

Tools & Technologies: Git, ReactJS, Angular, Django, Redux, Bootstrap, MySQL, MongoDB, Node.js, Express.js, Linux, Junit, jQuery, Docker, Kubernetes, Power BI, Excel, Visio, Azure

WORK EXPERIENCE:

Engineering Intern

May 2023 – August 2024

Ontario Power Generation – Work Management, Darlington, ON

- Developed a streamlined Work Report tool using **Power BI** Report Builder, **SQL** and **Python**, consolidating data from multiple sources into one interface, automating daily fieldwork reports, and reducing report generation time from legacy tools by **>90%**.
- Developed and optimized **SQL** views, tables, and procedures for large datasets, significantly reducing load times and enhancing performance of legacy systems used for critical project tracking.
- Designed and implemented automated metric dashboards in **Power BI**, using **Python** and **SQL** to provide real-time insights for project managers, simplifying access to project data for monitoring and enabling faster decision-making.
- Operated in high-pressure environments, delivering solutions under tight deadlines, where delays could result in substantial financial losses, while maintaining composure and multitasking across high-stakes projects.

Software Research Engineer

May 2022 – September 2022

Ontario Tech University- SAIN Lab, Oshawa, ON

- Designed and implemented a full-stack survey website using **JavaScript**, **HTML**, **CSS**, **ExpressJS**, **Node.js**, and **MongoDB** to raise awareness about Password Managers and the risks associated with weak passwords.
- Developed and documented **Python** scripts to analyze data from pilot testers, providing comprehensive process documentation for future reference.
- Achieved significant engagement, with over **1,000** users completing the survey on Amazon Mechanical Turk, resulting in a **50%+** increase in awareness of password management practices and the dangers of weak passwords.

Undergraduate Research Assistant

May 2021 – August 2021

Ontario Tech University- AD2M Labs, Oshawa, ON

- Created **Python** scripts to efficiently parse ASCII STL files, enabling rapid identification and resolution of errors.
- Developed an intuitive 3D visualization tool using **PyQt** and **Qt Designer** to assist in the repair of broken STL files.
- Built and launched **three websites** (ahmadbarari.com, ad2mlabs.com, robin-team.com) utilizing WordPress, **HTML**, and **CSS**, deepening expertise in front-end development and user experience (**UX**) design.

PROJECTS:

Bank Management System

- Developed a full stack bank management system using **ReactJS**, **Express**, **NodeJS**, **SQL**, **React Router** and **Redux**.
- Designed the Client-Server model architecture from scratch and created a modern and interactive UI with a fully functioning backend that gets and posts to a SQL database.

Online Grocery Store

- Led team of 4: Organized meetings, delegated tasks, helped teammates debug, etc., leading to a final grade of **100%**
- Designed a responsive online grocery store, implemented an authentication system, and built Home, Product & Cart Pages. Implemented dynamic cart functionality using **Redux**.
